PROFESSIONAL SUMMARY

Detail-oriented and driven Backend Developer with hands-on experience at Intechno Software Private Limited, specializing in Laravel-based web application development. Proficient in building and integrating robust RESTful APIs, implementing secure authentication systems with Laravel Jetstream, and enhancing user experience through dynamic interfaces using AJAX and JavaScript. Adept at designing scalable backend solutions and collaborating across teams to deliver efficient, maintainable code. Passionate about clean architecture, continuous learning, and contributing to impactful software products. Seeking to leverage technical expertise and problem-solving skills in a challenging backend development role.

SKILLS

- **Backend development:** Laravel (Jetstream, MVC Architecture, API Integration, Email Sending via API) , Core PHP , MySQL / Database Design, XAMPP / phpMyAdmin
- **Frontend Technologies:** HTML, CSS, Bootstrap, JavaScript, Ajax
- **Tools:** XAMPP, Visual Studio, Sublime, Git, GitHub
- **Soft Skills:** Problem-solving, Team collaboration, Communication, Project management

EXPERIENCE

Freelance Web Developer

Self-Employed | Remote | [Sept 2024] – Present

- **Clothing E-commerce Website:** Developed a fully functional eCommerce site using PHP and MYSQL featuring cart system, order management, product catalog, and email notifications.
- **Sudha Hospital Attendance & Scheduling System:** Created a custom web application using HTML, CSS, JavaScript, PHP, and MySQL for managing hospital staff, including features like:
 - Photo records for attendance
 - Time management and scheduling interface
 - Staff registration and role-based management

Backend Developer (Laravel & API Development)

Intechno Software Private Limited | [Kota] | [Jan – Apr 2024]

- Developed and maintained scalable backend systems using Laravel, focusing on performance, security, and maintainability.
- Integrated RESTful APIs for seamless frontend-backend communication and third-party service interaction.
- Implemented user authentication, authorization, and session management using Laravel Jetstream.
- Enhanced web application responsiveness and interactivity using JavaScript and AJAX.
- Collaborated with cross-functional teams to troubleshoot issues and deploy new features efficiently.
- Contributed to codebase documentation and participated in agile development processes.

Web Development Intern

The Sparks Foundation | October 2023

- Completed a hands-on internship focused on PHP and MYSQL development principles.
- Gained experience in building dynamic websites and working with frontend-backend integration.

PROJECTS

Job Portal Web Application (Laravel, PHP, MySQL, HTML, CSS, JavaScript, Bootstrap) :-Developed a fully functional job portal that allows employers to post jobs and jobseekers to apply. The system supports multi-role authentication, dynamic dashboards, and admin-level approvals.

- Role-based login system (Admin, Employer, Jobseeker)
- Employers can post jobs, view applications, and manage listings
- Jobseekers can apply to jobs by uploading resume and cover letter
- Admin dashboard for managing users, job approvals, and application review
- Database relationships managed using Eloquent ORM

E-Commerce Platform for Books (Core PHP & MySQL)

- Developed a dynamic eCommerce website for book sales using Core PHP, MySQL, Bootstrap, HTML, and CSS.
- Integrated features such as user authentication, product catalog, cart functionality, and order management.

E-Commerce Website for Clothing (Core PHP & MYSQL)

- Built a scalable clothing eCommerce platform using PHP Core, featuring email notifications via API, user registration, login, and product management.

Employee Management System (Laravel):

- Role-based admin panel to manage departments and staff with CRUD features, photo uploads, and dynamic form handling using Laravel MVC architecture.

Quiz Game Website (Core PHP & MySQL)

- Developed an interactive quiz platform with timed questions, scoring, and admin panel using PHP, MySQL, HTML, CSS, and Bootstrap.

Student Registration System (Laravel)

- Role-based web app with admin/student login. Admin manages student records; students register and view personal data securely via Laravel.

Hotel Management System (WordPress & MySQL)

- Built a hotel management system using WordPress, integrated with XAMPP (MySQL) for backend operations like bookings and room listings.

Java Learning Platform (Android Studio)

- Created a Java-based mini learning application using Android Studio to provide educational resources and interactive content for beginners.

Quiz Game App (Java - Android Studio)

- Designed a quiz game mobile app with score tracking and interactive UI using Java in Android Studio.
